Observations and Evaluation of Dewatering Controls

The following document was created based on the observations and evaluation of dewatering controls pursuant to Part IV.C. of the Texas General Permit. This report is limited to observation and evaluation dewatering activities discharging off-site and the controls affected by such discharge.

SWP3DWC Form Rev.11/15/23

Project Name: _____ Date: _____

Permit Number(s):_____ Reason for inspection: Dewatering Discharge Activity

Contractor: _____ Inspector: _____

Qualifications: Shown within SWP3 as allowed by General Permit Title: _____

Is there a discharge from the site due to dewatering activities: ◯ Yes ◯ No If "No", the rest of the report does NOT need to be completed

Approximate start of dewatering discharge:_____ Estimated quantity of discharge _____ gallons/day

Approximate end of dewatering discharge :_____ ☐ Discharge Continuing after hours

The following list are potential controls that are used / affected by the pumped water prior to leaving the site

Potential Control	Is Control Used	Notes on operational effectiveness
Dewatering bag on hose	◯ Yes ◯ No	
Silt Fence	◯ Yes ◯ No	
Inlet Protection	◯ Yes ◯ No	
Rock / Sandbag Berm	◯ Yes ◯ No	
Vegetated buffer (length _____ ')	◯ Yes ◯ No	
Sediment Basin	◯ Yes ◯ No	
Other: _____	◯ Yes ◯ No	
Other: _____	◯ Yes ◯ No	

SWP3DWC Form Rev.11/15/23

Are there any indications of pollutant discharge observed at the point of discharge:
(e.g., foam, oil sheen, noticeable odor, floating solids, suspended sediments or other obvious indicators of stormwater pollution)

◯ Yes ◯ No If "Yes" explain:_____

Locations of Discharges of Sediment or Other Pollutants from the Site from Dewatering .

_____

Locations of Dewatering BMPs that need to be Maintained.

_____

Locations of Dewatering BMPs that failed to operate as designed or proved inadequate.

_____

_____

Locations where additional Dewatering BMPs are needed.

_____

_____
